AirCozy Pillowcases

AirCozy Thermal Far Infrared Pillowcase

- Optimal choice for thermal pillowcase in the winter
- Generates heat and achieve the effect of relaxation.
- Regulate physiological functions and reduce fatigue.

When human gets into sleep, the body temperature will gradually drop. With those poor blood circulations, body will turn on body mechanism and start shaking to generate the heat; however, at the same time people will have muscle tightness which is not able to fully relax the body and also can't get into deep sleep stage. Eventually, it will accumulate the fatigue and reduce the quality of sleep. **Far infrared ray fiber** is called ceramic fiber, because the ceramic is built inside fiber enable the fabric can absorb energy from sunlight or human body. It can penetrate skin deeply to boost the water molecule coming into resonate and generate heat. It will expand capillaries to improve the blood circulation, accelerating metabolism and cold hands and feet which can solve the problem of sleeping fatigue to recover physical fitness during the sleep and improve the quality of sleep.

AirCozy Cool Touch Pillowcase (Taiwan fabric)

- Made by Cool Touch fabric technology that is thermo-regulating from Taiwan.
- Cool touch, Absorbs heat slowly and dissipates heat quickly.
- Gets into deep sleep stage faster.

AirCozy Cool Touch Pillowcase (Japan fabric)

- Made by Cool Touch fabric technology that is thermo-regulating from Japan.
- Cool touch, Absorbs heat slowly and dissipates heat quickly.
- Gets into deep sleep stage faster.

Scientists from Netherlands Institute for Neuroscience (MIN) have found out that the quality of sleep is better when human's skin temperature is slightly lower. To lower testers skin temperature by about 1° C. The result was overwhelming which was able to help testers to get into deep sleep stage faster and no long wake up as many times as before at night. Moreover in the elderly testers who suffer from insomnia, it is found out that the effect of using cooling skin method to improve sleep is significant.
