OUR AMBITION

There is enormous potential in this digital age for interdisciplinary teams to work together solving the great challenges we face in the field of science, and challenging many aspects of how we live our lives.

Mobile technologies have opened the door to endless opportunities. Researchers, scientists and engineers are able to build increasingly extraordinary products and create entirely new services.

WHAT WE DO

At TechNovus, we develop and deploy innovative, disruptive and new-age digital solutions that leverage the new and emerging technology trends.

This means we support every stage of turning an idea into reality. We offer consultation and business development in early stage ideas - from conceptualisation, research and development, to the deployment of innovating technology applications and platforms. And we do all this at unrivalled costs.

HOW WE DO IT

At TechNovus, we partner with experts around the globe who share our passion and commitment, world renowned scientists and engineers that help us to deliver ground-breaking innovative solutions in science and technology. We harnesses talent pools wherever they may be and have developed global ideas exchange platforms on some of the most challenging science.

We support our project partners by:

- Providing leadership, management skills and expertise
- Promoting the merging of industries and cross-pollination of technologies.
- Building interdisciplinary teams of scientists, medics, engineers and digital IT specialists
- Utilising information and communication technology for better cross-linking of information
- Offering access to our competencies in computation science and data management - knowledge wrapping

We also partner with world-leading scientific and medical institutions who are opinion leaders and have a proven reputation, competencies and skills in the key areas of opportunity and who share the same broad philosophy, including Imperial College London, Ecole Polytechnic Federation Lausanne, Brain Mind Institute, American University of Beirut.

UNRIVALLED EXPERTISE

For nearly two decades, the team at TechNovus have been innovating and delivering trans-formative solutions across a range of sectors.

HEALTH

Digital health platforms | Brain computer interfaces | Neuro feedback

BUSINESS

Data mining | Data analytics | Business process re-engineering

INFORMATION TECHNOLOGY

Cyber security | Blockchain architecture | Artificial intelligence

MEDIA

New age 3D media for live events | Virtual worlds | Augmented reality

FASHION

AI body measurement solutions | Virtual fabric sensing | Subscription commerce

ART

Therapeutic interactive art | Art and wellness products | Mindfulness art therapy
